Workshops ISDC2021!

Online Conference:
Facilitators can choose time slots AM, PM, or Both (live-repeat) for live, synchronous workshop presentations.

The virtual conference has ten Zoom meeting spaces and four time slots, over two days, which amounts to time/space for eighty 1.5-hours workshops.

> July 29 and July 30:
> > AM Chicago time 800 and 1000
> > PM Chicago time 1800 and 2000

There will be a dedicated Workshop Page that will have a comprehensive list of workshops, links to the workshop abstract and any related materials, dates and times, a workshop sign-up button, and an associated button for each workshop to view the recordings. Original submissions and live-repeat workshops are listed in the online conference.

Recordings:
The Technical Organizer will record the live workshop sessions, by default, using Zoom. If the facilitator does not want the workshop session recorded, please inform the Zoom room Technical Organizer. Both the Original and Live-repeat sessions may be recorded, then the facilitator can choose the best for the video link which will be available in conference online conference.

Alternately, a pre-recording can be used if links are supplied in advance by the facilitator.

Recordings will be available to registered conference participants for asynchronous use until August 31. Recordings will not be listed separately in the online conference; they will be linked to the workshop.

Note: If there is any person who is not a presenter in the recording, it cannot be provided to the presenter. However, presenters are encouraged to record themselves and edit out any participant interactions if they want to reuse the content. If you feel strongly you would like a copy of the video, please contact the office, after the conference, for possibilities.

There is a possibility that the Society will contact you about use of the video after the conference. If this were to occur, the video would be sanitized to remove all persons who are not the presenter.

Sign-up function:
Each workshop will have a sign-up sheet. The sign-up sheet will not preclude a participant to attend a workshop, unless there is a maximum capacity indicated. On the other hand, not everyone who signs up will come. It is up to the facilitator, with assistance from the Technical Organizer assigned to the room, to come up with a plan to monitor capacity.

Facilitators will be able to see who has signed up at any point prior to their workshop. All attendees will have a profile page for the conference, where you will be able to see any background information they have provided that way. If email addresses are provided in the profile, you may communicate with attendees in advance of the workshop.

Technical Support:
Each workshop will have a [Technical Organizer](#) who will be your point of contact regarding Zoom issues. Alan Mozaffari, the Volunteer Coordinator will be making these assignments. Once you have your Technical Organizer assigned, we will provide the name and email address to you. You can communicate directly with the technical organizer about any special tasks for your workshop.

Conference Record
For a workshop, the *Conference Record* will contain the title, facilitator names, a 200-word abstract, and a link. The due date for this information is September 7. The *Conference Record* will be archived on the System Dynamics Society website.

Upcoming communication:
We will have a workshop dry run available a week or so before the conference—details to be determined. We will keep you posted.

We will be in touch if there are questions or changes. Let us know (early) if you need something additional; we will try to accommodate. Email progchair@systemdynamics.org
