

# POSTER GUIDELINES

*International System Dynamics Conference*

- ❖ Prepare a single slide/page poster (required). Submit your poster, paper, supplementary material, and video link using the Web Portal.
- ❖ Conference participants will be able to access your paper, poster, supplementary material and video link on the conference site when the conference opens until August 31.

- ❖ Format: Landscape Orientation (4:3). This is the normal default setting in PowerPoint.
- ❖ Size: Letter works well as all posters will be scaled for presentation.
- ❖ Font size: 18+ (large font in general)

- ❖ Limit the amount of information on your poster. Diagrams should be easy-to-read, un-crowded, and focus sharply on the main point.
- ❖ You are encouraged to record your presentation and make a video available.

*More guidelines in conference help . If you have any questions, please contact the System Dynamics Society office:
